

# Soft Close Mechanism

Soft Close Mechanisms are designed to allow sliding doors to close softly and quietly. These mechanisms also help ensure that the sliding door is fully closed and prevents it from floating open or closed.

## Soft Close for Round Bar Track

### Standard Features

- Made of a mix of plastic and steel parts for long lasting durability
- Invisible Look- Mechanism mounted inside the round track so not to be seen from the front view of the door opening.
- Easy Installation- track is prepped in advance, NO ADDITIONAL DRILLING or CUTTING is required
- Use Suffix "SC" when ordering

### Used on Models

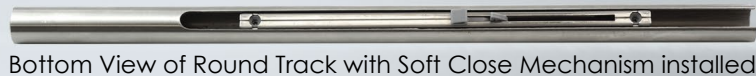

- SDS-2000, SDS-2100 and SDS-2200

### Finishes

- Zinc Plated-Standard
